Strategy

12

Bringing order to chaos

Predicting conflict could save lives. Are we finally getting better at it?
By Tate Ryan-Mosley

16

Radical transformation

After years of efforts to prevent and reverse radicalization, the jury's still out on whether they work. By Obi Anyadike

20

Why clean war is bad war

By sanitizing warfare, technology makes it easier to kill people, argues *Jarhead* author Anthony Swofford

24

The everything war

Amazon has spent a decade trying to become one of the world's biggest national security contractors. Here's how and why. By Sharon Weinberger

30

What a real existential threat looks like

Misunderstanding tomorrow's dangers means that we're fighting yesterday's wars, argues one paratrooper turned academic. By Janine di Giovanni

2

Battlefield

34

Empire, state-building

Reports that China is catching up to the US's military have been greatly exaggerated. By Konstantin Kakaes

36

Signal intelligence

The US military is trying to develop a brain-computer interface you could wear like a helmet. What if it succeeds?
By Paul Tullis

40

Uncommon scents

All our high-tech machinery still can't do what a dog can. By Haley Cohen Gilliland

44

The fog of AI war

Can you tell a turtle from a rifle? AI vision can't always manage. By Will Knight

48

Drafted into the meme wars

Memes come off as a joke. That's part of why they're a serious threat. By Joan Donovan

52

A cyber-attack hits the US. Now what?

We asked seven cybersecurity experts to detail how it all might play out. By Patrick Howell O'Neill

56

Life under a drone sky

America's longest war has been shaped by technology, and Afghanistan has been the unwilling testing ground. By Ali M. Latifi

60

A divided West is the worst of all worlds

Split strategies over nuclear proliferation could spell disaster, says one of the world's most decorated soldiers. By Janine di Giovanni

3

Aftermath

64

Hard evidence

Digital technologies have allowed Syrian war crimes to be documented in unprecedented detail. But has it done any good?
By Eric Reidy

70

Becoming whole

Modern medicine has saved war veterans with horrific genital injuries from dying. Now it's finally giving them hope of a normal life as well. By Andrew Zaleski

78

Fiction: AN41

In the winning entry from an Army science fiction contest, a human with an AI-augmented brain leads the way. By Jasper Jeffers

88

Looking back at the future of warfare

Our war coverage through the years has emphasized how technology might change the way wars are fought—or how it could help us avoid conflict in the first place.
